## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see pages 6-7 of the "Remarks/Arguments" section of the response filed April 30, 2009 with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

On line 4 of claim 8, the recitation, "the outlet faces of the aerator turning tool and the fixture" is unclear. While an "outlet end face" is recited in claim 1 with respect to the "fitting", however there is no clear antecedent basis for an "outlet face" of the "aerator turning tool".

Art Unit: 3752

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-4, 7 and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Benstead et al, US Patent Application Publication No 2002/0185553.

Benstead shows a plumbing fitting (100, 102) being detachably held in a plumbing water outlet armature (18) by a screw connection (72, 116) (see Figure 3; and see paragraph [0038]). Benstead further shows an aerator turning tool (see Figures 18-19) which is placed in a rotationally fixed manner on the fitting, wherein the aerator turning tool has a profiling/contouring (158) on an end face side which is placed in a rotationally fixed manner on a mating profiling/contouring (126) provided on an outlet end face (at 112) of the fitting (see paragraph [0040]).

***Allowable Subject Matter***

6. Claims 5, 6 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3752

***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
